

# Pipelayer Attachment

## SPECIAL FEATURES

Model CP583K / CP572G  
 Hydraulic Pipelayer Attachment  
 Designed for mounting on  
 Caterpillar D8K Tractor (CP583K)  
 Caterpillar D7G (CP572G)

### ***Special Features of the Challenger CP583K and CP572G hydraulic pipelayer attachment.***

The CP583K and CP572G are very easy to operate with a minimum amount of training needed. These hydraulic pipelayer attachments feature:

- 140,000 lbs. tip capacity (CP583K) and 90,000 lbs. tip capacity (CP572G).
- Hydraulic counterweight with Caterpillar style counterweights.
- Standard 24 foot boom (longer optional booms available).
- 3 section directional control valve with open center spring return.
- Hydraulic tank mounted under the fuel tank for operator comfort.
- Increased hydraulic tank size keeps the system running cool and extends the life of the hydraulic components.
- M30 Two speed planetary load line winch with free fall.
- M30 Single speed planetary boom winch.
- High volume hydraulic pump for speed.
- Counterweight segments are interchangeable with Caterpillar.
- Hydraulic boom stop.
- Optional tail winch guard with 3 axis umbrella rack available.

**As pictured above, the hydraulic tank is mounted under the fuel tank, rather than by the operator. This keeps the heat of the tank away from the operator and increase operator comfort. In addition to operator comfort, the increased size of the hydraulic tank keeps the system running cool.**

**As pictured below, the hydraulic counterweight is the Caterpillar style. This makes the counterweight segments interchangeable with Caterpillar.**
