Challenger Stick Extension

Challenger Stick Extension for Hydraulic Excavators

When used for stringing pipe along the right-of-way or handling other material, the Challenger Stick Extension for hydraulic excavators improves productivity and safety. It allows for pin-point placement along the right-of-way especially in those hard to reach areas with poor underfooting. Challenger Services offers this attachment to fit all makes of excavators in the 40,000 to 70,000 lb. ranges.

Options

Custom made extensions available for special applications.

Bushing kits for adaptation to various makes and sizes of machines are available.
