

Beveling Equipment

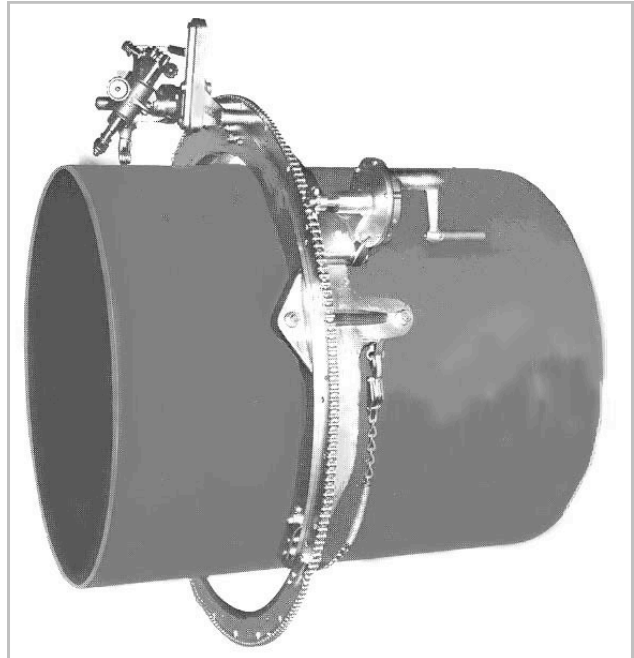

Cutting & Beveling Machine Saddle Type

Saddle Cutting & Beveling Machines For Pipe Sizes 3" to 60"

The Model 200C has been serving the pipeline industry for many years. It features:

- Convenient mounting over-the-end or in-the-middle of the work.
- Special compact design for use in a minimum space.
- Lightweight rigid construction of finest aluminum alloy.
- Full circle traveling ring to assure smooth operation.
- Virtually eliminates grinding costs.
- Available adapters for conversion to double cutting machines.
- Accurately graduated torch holder sets torch angle.
- Simple adjustment adapts machine to different pipe sizes.
- Torch holder accommodates any standard machine cutting torch.

Note: Sizes above 48" are special order. It is recommended that Saddle Cutting and Beveling Machines 20" and larger be equipped with an out-of-round attachment to insure true and accurate bevel cuts.

MODEL 200C

All sizes of Saddle Cutting and Beveling Machines are equipped with Standard Torch Holder. Cutting torch above is shown for illustration only; torches available as optional equipment.
